

APU and Line Replaceable Unit pooling program

APU Maintenance Service Agreement program

APU Engineering Management Control program

Small Engine Overhaul Division

*Introduces*

**TAC**

A **Honeywell** Licensed Repair & Overhaul Facility

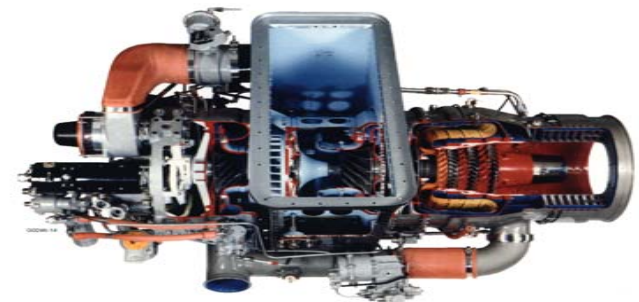

GTCP331-200/250

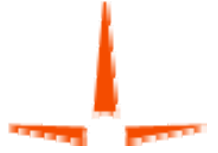

GTCP331-350

GTCP331-500/600

GTCP131-9A

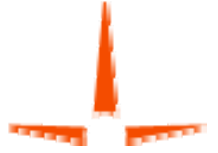

# TAC One stop APU Management

- ✚ **Reduces Engineering Costs**
- ✚ **Reduces Airline Spare APU and LRU inventory**
- ✚ **Improves APU Dispatch reliability**
- ✚ **Improves efficiency of Line Defect Rectification**
- ✚ **Provides on going APU on wing reliability monitoring and performance enhancement development.**
- ✚ **24 Hr International Maintenance Control Centre**

# TAC How does it Work?

- ⚡ **SEOD offers to purchase your existing Spare APU's and LRU's**
- ⚡ **Pay per APU Hour on a monthly basis for full maintenance and repair coverage and FOD.**
- ⚡ **Pay a Component reserve per APU hour for full LRU replacement and repair cover**
- ⚡ **Pay a monthly fee for access to the SEOD APU/LRU pool.**

# *TAC* - leave it up to us

- ✚ Included in our *TAC* program is all your Engineering reliability and performance monitoring/PTM fleet trend monitoring.
- ✚ Defect troubleshooting and rectification in direct communication with your MCC on a 24 Hr basis.
- ✚ In addition SEOD establishes the soft life and call off schedules for all APU and LRU repair work scopes to your fleet and environmental Operation.

For more information on this unique opportunity to join the TAC program please call or write to:
